### Self Contained and Mobile

Ensures flexible site application and efficient work capabilities since external service and power systems are not required.

### Light Truck Towable

The platform can be towed to a location with a light truck, saving on costly heavy truck and picker rates.

### Increased Crew Safety

The simple setup, integrated safety railings and stable stairs minimize the risk of slips, trips and falls.

### Four-Sided Access to Well Head

Our innovative design and adjustable floor panels allow crews to access and work on all sides of the well head.

### Hydraulic Control System

The platform's functions are operated via a reliable hydraulic control system with safety features built in.

### Trouble-Free Operation

Our platform was designed for a long, trouble-free service life with minimal maintenance to ensure unprecedented uptime.

## SAFE AND COST EFFECTIVE

- Engineered design and certified annually.
- Stable and sturdy work area - 2000 lbs load capacity.
- The platform is totally enclosed, with lanyard tie-offs if needed.
- Quick, safe, and easy egress in the event of evacuation.
- Safe and easy to move - perfect for single-well or pad projects.
- General setup and tear-out time is less than 30 minutes.
- A one or two member crew (dependant on customer requirements) can transport, setup and operate.
- No picker required for setup or tear-out.
- Eliminates the need for heavy transport equipment, pickers, loaders, or large crews associated with scaffolding setups.

## EFFICIENT
